

LED FUTURE

ROOM DISINFECTION DEVICE

There are 12 UVC-units in one disinfection device.

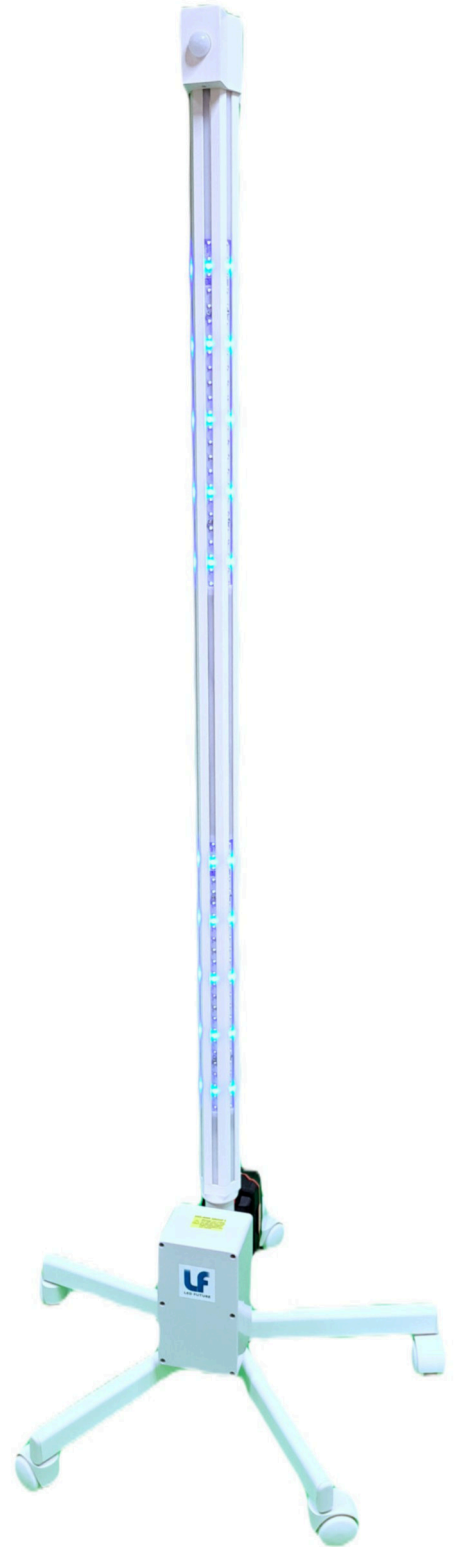

They are placed in six different directions to obtain 360-degree coverage around the device with UVC-light

The device is controlled by a remote controller, which is used to turn the device on and off.

The disinfection time depends on the size of the room: a 10m² space can be disinfected effectively in 15 minutes.

TECHNICAL DETAIL:

- Device controlled with a remote controller
- Input 24DC
- Rechargeable battery 4Ah (charger included)
- Available as an accessory:
an additional battery and a dual charger.
- Height 1740mm, length 640mm, width 640mm
- Safety measurements, 2-pcs motion detector
